

PRSoft and TuChequera.com Provide One-of-a-Kind Solutions

José García, CPA, TuChequera.com and Jennifer Bates, founder & president of PRSoft Inc.

BY CB STAFF

It was a very special day when Jennifer Bates, founder & president of PRSoft Inc., visited CPA José García at his offices at TuChequera.com. PRSoft had been looking for a payroll processing application that was geared for Puerto Rico labor laws, and that would import easily into PRSoft's top-selling

employer reporting application, PRPay.

It was not long before García and Bates signed an agreement to co-market their solutions, which together provide businesses in Puerto Rico several options. With this combined solution, a small business can prepare its own payroll in the cloud using TuChequera.com, to be retrieved by their accountant to

prepare quarterly reports, W-2 forms, 480 forms, etc.

As a second option, the business itself could subscribe to PRPay and produce payroll, plus all required forms and reports in-house. A third option would be for the accountant to prepare the payroll and print checks remotely at the business' location. It would be up to the business to decide what works best for it.

TuChequera.com is a bookkeeping platform with check printing capabilities and full payroll calculation, with reports 100% exportable to various formats. This product was developed primarily for midsize and small businesses and all accounting firms. The software is 100% cloud-based and very easy to use.

"Using TuChequera.com lowers the costs for our customers," García said. "We developed this platform because during 2013, with the economic downturn, we found ourselves with several customers who couldn't pay our full rate for accounting, payroll and tax preparation services combined. We thought if we could provide our customers a tool to register their day-to-day transactions on their own, in an easy way, including print their payroll checks, then we could continue to perform their other accounting tasks."

García explained that the administrative tasks that businesses confront every day are as important as the operations themselves. Sometimes business owners do not have the know-how or the budget to fill that area in an effective way.

"We are fulfilling that necessity with an easy, low-cost solution," García noted. "We are offering the application for 30 days, free of charge, to make sure our customers know exactly what they are getting before they make the commitment."

PRSoft Inc. is a privately held Puerto Rico corporation whose purpose is to produce and support software applications designed specifically for the Puerto Rico market. PRSoft was established in 1993 in the home of its founder and president, Bates, and now located in its own building in Santurce. With 20 employees, the firm continues to produce a suite of tax and compliance applications, boasting high customer loyalty and satisfaction.

PRPay is used by thousands of CPAs, accountants and businesses. "Our products have evolved in response to our customers' suggestions, as well as to the advent of cloud computing," Bates explained. "PRPay was the first of PRSoft's products upgraded to a totally new platform, adding to its ease of use and elegance. Watch for more upgrades among other PRSoft

products, as we continue to bring quality software and up-to-the-minute technical support."

Government agencies are continually changing their requirements, as well as the forms and digital files used to collect employer data. A software company in this business must be ready to change processes with very little notice, and PRSoft has managed to stay on top of the changes year over year, for more than 20 years.

Today, businesses and accountants can use TuChequera.com, PRPay, or both. These two software companies have formed an alliance based on simplicity, efficiency and cost-cutting, something that should interest every business in Puerto Rico. ■
